What's at Risk?

- Childhood obesity is a national epidemic. Nearly 1 in 3 children (ages 2-19) in the United States is overweight or obese, putting them at risk for serious health problems.
- Some experts believe that if obesity among kids continues at the current rate, this generation could become the first in American history to live shorter lives than their parents.
- The Alliance for a Healthier Generation is taking action to reduce the prevalence of childhood obesity by making it easier for kids to be physically active and eat healthier foods

The Alliance for a Healthier Generation

REACH and IMPACT

Founded by

The Alliance teams up with Sanofi US

- Healthcare
- Healthy Schools
- Success in New Jersey
